

Sunless Release Form
THE TANNING RESORT

It is our pleasure to bring you the Cal-Tan AutoBronzer. You're on your way to a beautiful UV free tan. Before using this unit it is important you understand a few things...please read below and sign and date at the bottom, stating that you read and understood the following:

- To get desired results, it is very important you fully exfoliate your skin prior to using the AutoBronzer. You do not want to have dry, rough skin, or that part of the skin will absorb too much solution and you will not get an even tint.
- We offer Primer Towelettes to exfoliate skin for only \$2.50, or Primer by the bottle for \$15.00

- Color from the AutoBronzer will last about 5-7 days. If you would like it to last longer, we offer Extender, a lotion that hydrates skin while enhancing, preserving, and extending sunless results with bronzers.(\$15.00) If you would like to touch up or re-spray yourself a couple days later for a boost of color, We offer the bottles of Self-tanner (the same solution we use in the AutoBronzer) for only \$20.00.

- We also offer a trio pack, which includes smaller bottles of Primer, Extender, and Self Tanner for only \$18.00. See Salon Associate for details

- We provide Barrier Cream, which is a protective lotion to avoid staining and streaking of the obvious problem areas, your feet and hands.
Please remember, it is YOUR responsibility to make sure you take the time to apply it correctly.
 - **On your hands**, make sure you put a few applications on. Rub into cuticles, between fingers and on the palms of your hands all the way up to where your palms meet your wrist.
 - **On your feet**, make sure you put a few applications on. Rub into cuticles, between toes, on ankles and especially the soles of you feet.

- The Barrier Cream will work if it is applied correctly, but we all make mistakes. If you mess up, its all right, we sell corrector kits, a sunless solution remover for the skin (only \$15.00)

- We will provide you with hairnets, nose-plugs, and protective eyewear. The FDA strongly urges consumers to use eyewear and nose-plugs. The hairnets are optional. If you have color treated hair we suggest wearing the hair net.

- There are 3 different levels in the AutoBronzer. The levels do not determine the Darkness of the spray. The levels determine how long you are sprayed for. The Level of spray is proportional to your body size, the Salon Associate, who is trained by California Tan, will determine what level you are. Choosing the wrong level may cause undesired results.

- After you are sprayed and completely dried off, wipe off hands and feet with baby wipes and a towel, blend areas around the hands and feet.

- The color that may rub off on your clothing is just the tint from the solution. This is not rubbing off your tan and will not stain most clothing.

- The sunless solution may stain some silks so we suggest wearing old or dark colored clothing.

- To get best results, when you are done being sprayed, hop in our stand-up booth for a 5-minute session to bake it on.

- Do not shower for 4-6 hours so the solution has time to develop. Take care not to sweat or get caught in the rain, as it will cause streaking or spotting.
